

One's – Miss Katie Week of December 21-December 25, 2020

Peek at Our Week

Standard Focus	Activity	Home Extension Activity
Begins to show eagerness and curiosity as a learner, Approaches and explores new experiences in familiar settings.	Play with a shape sorter with the children to promote their curiosity about how the shape will fit into the box.	Play a hide and seek game to promote curiosity in your child by making them wonder where the object that they just saw had now disappeared and where did it go?
Develops increasing ability to engage in social problem solving	Have the children practice sharing toys and by practicing this technique it will help the children in the classroom engage in social problem solving.	Practice sharing toys or an object at home with your children because this will help them in the classroom to understand sharing with their friends is a good quality and it will help promote the children to want to play with each other.
Begins to recognize characteristics of self (eyes, nose and hair)	Sing head, shoulders, knees, and toes so the children can begin to learn different body parts.	Take a doll or stuffed animal and point to the eyes, nose, and hair. Then point to the same body parts on your body so that your child can learn those body parts.
