

STANDARDS	ACTIVITY	HOME EXTENSION
<p>Faith Formation- Creation V. Mathematical Thinking D. GEOMETRY 1. Recognizes and names typical shapes (circle, square, triangle)</p>	<p>We will take different shaped blocks from the block center outside during outside time. We will discuss how God created the light and the dark, show the children the shadows of the blocks on the sidewalk, help them name the shape of each one and trace the shadows onto paper.</p>	<p>While outside playing with your child this week, point out the shadows of yourselves and different things around you! Talk to your child about the First Day of Creation and how God Created the LIGHT and the DARK.</p> 
<p>Second Step/Skill Streaming- Reading Others</p> 	<p>In small groups, we will discuss different scenarios and the faces we would create during those scenarios, we will let the children use a mirror to look at their expressions.</p>	<p>After bath time one night this week, make funny faces in the mirror with your child, then go into talking about different scenarios your child may encounter during their day. Make the appropriate faces that someone would make during those scenarios and have your child make the faces too.</p>
<p>Second Step/Skill Streaming- Being Kind</p>	<p>During circle time, we will read a book (about bullying and being unkind, such as Monty the Manatee) and let the children identify if the characters are being kind or unkind, and what the character could have done differently.</p>	<p>This week when reading bedtime stories to your child, have your child point out if and when the characters are being kind.</p>
